## DETAILED ACTION

Claims 1-15 are currently pending in this application.

### *Allowable Subject Matter*

Claims 1-15 are allowed.

The following is an examiner's statement of reason for allowance:

Claims 1-9 are allowable over the prior art of record because the prior art of record does not teach or render obvious an electrostatic discharge protection device with positive voltage and negative voltage tolerance, the device being connected to a pad in an integrated circuit, the device comprises a second type first doped region, disposed inside the first type well, the second type first doped region being coupled to a second voltage line; a second type second doped region, disposed inside the first type well and coupled to the pad; and an isolation structure between the second type first doped region and the second type second doped region, and in combination with all other features as recited in independent claim 1.

Claims 10-15 are allowable over the prior art of record because the prior art of record does not teach or render obvious an electrostatic discharge protection device with positive voltage and negative voltage tolerance, for protecting an internal circuit in an integrated circuit, the internal circuit comprising at least a positive voltage input/output terminal and a negative voltage input/output terminal, the device comprises a second type first doped region, disposed inside the first type first well and coupled to the system voltage line; a second type second doped region, disposed inside the first type first well and coupled to the positive voltage input/output

terminal; a first isolation structure, disposed between the second type first doped region and the second type second doped region; a second type third doped region, disposed inside the first type second well, the second type third doped region being coupled to the ground voltage line; a second type fourth doped region, disposed inside the first type second well and coupled to the negative voltage input/output terminal; and a second isolation structure between the second type third doped region and the second type fourth doped region, and in combination with all other features as recited in independent claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
